- b) Coulomb's law states that the force between two charges is directly proportional to the product of the charges.
- c) Coulomb's law applies in free space and isotropic media.
- d) Both b and c are correct.

Answer: d) Both b and c are correct.

Explanation:

Coulomb's law states that the electrostatic force between two point charges is proportional to the product of the magnitudes of the charges and inversely proportional to the square of the distance between them. It is valid in free space and isotropic media. The law is specifically applicable to point charges but can be extended to continuous charge distributions under certain conditions.
